

Make your doors fit better, last longer.

Full Surface Continuous Gear Hinges

Half Surface Continuous Gear Hinges

"The wind was catching the doors and pulling screws right through the butt hinges. The SELECT continuous gear hinges really solved this problem."

- carpentry foreman,
Illinois recreation
& exposition facility

- Pair-matched hinge leaves are manufactured together, machined together and anodized together, making SELECT Hinges fit your doors better and last longer.
- Anodizing after machining delivers superior wear, durability and life.
- High-traffic durability stands up to millions of cycles.
- Consistent templating assures each SELECT Hinge lines up perfectly, every time.
- Coated fasteners give superior corrosion protection.
- Unique screw-hole pattern puts holes at critical stress points to make installation better and faster.
- Custom anodizing and painted finishes match any color you need.
- Dry, graphite-based lifetime lubricant eliminates the need for periodic maintenance.
- Lifetime warranty.
