Editors' Choice: Top Product Picks

Strobic Air

Strobic Air Corp. Circle 272.

Advantages include a low-profile design, precise control, and vibration-free operation.

Acoustic canopies combine good looks with performance. What makes the systems ideal is the design, which help reduce reverberation time. The canopies also feature the Ultima™ Dura-coating, which provides a very high Light Reflectance

factor. The surface also enhances the durability and scratch-resistance of the canopies. Additionally, the new high-recycled-content canopies are also seismically approved. **Soundscapes by Armstrong World Industries Inc. Circle 273.**

"Soundscapes combines the ability to provide spot acoustics in open-plenum areas along with an aesthetically pleasing visual – performance and beauty that enhances worker comfort and productivity."

Eliminate the repair/replacement hassles of worn-out hinges. SELECT Hinges™ aluminum geared continuous hinge surpasses

20 million open/close cycles in independent testing without a loss of performance. Pair-Matched™ hinge leaves, lifetime lubrication, and anodizing after machining work together to give SELECT geared continuous hinges long life. Ideal for high-traffic facilities, SELECT geared continuous hinges provide clean lines down the entire length of a door. **SELECT Hinges aluminum geared continuous hinge by SELECT Products Ltd. Circle 274.**

"Durability and life-cycle costing, maintainability, efficiency, applicability, appeal, aesthetics, and ease of use: SELECT Hinges offer it all."
