LED downlights by Prescolite

HARDWARE – Stop making ugly repairs by using extra screw holes, welds, and rivets to strengthen failing hinges. The SL57 full-surface continuous geared hinge is extremely durable – it was still performing after 25 million open/close cycles in independent testing. Save money by reusing the existing door and frame. Installation takes 30 minutes in retrofit applications on high-traffic doors. Once installed, you'll never have to buy another hinge. With proper installation, SELECT's Continuous Warranty covers any failure of the hinge with no expiration date. **SL57 full-surface continuous geared hinge by SELECT Products Ltd. Circle 205.**

SEATING – Following 7 years of extensive research, Keilhau developed Sguig, a task chair that recognizes and accommodates individual differences in sitting posture.
